# AD&S INC.

About Our Company

AD&S has been in business for the past 29 years. We were pioneers in the industry and we continue to be on the cutting edge of software development and biometric solutions. We have installed systems in 25 states plus Washington DC and the country of Chile. Our software applications are used by State Agencies, Law Enforcement Agencies, School Districts, Federal Agencies, Department of Defense Contractors, Airlines, Healthcare Facilities and Childcare Facilities.

Service and Satisfaction

Customer satisfaction is very important to us. We offer remote and onsite support, training and demonstrations. We have a technical support team available to take your calls and assist in a timely manner.

FingerPro ID Software

Unlike other biometric vendors who demand that your aging system be retired and you purchase a new one at significant cost, AD&S continues to update your FingerPro ID System to the latest version at no additional cost as long as you are renewing your low-cost annual maintenance contract. This means that you can continue to update in-house by purchasing your own PC equipment and as long as it meets minimum specs, you will have the latest system offered. Other vendors require a complete new system. When your livescan reaches the end of its life cycle, AD&S will offer a new live scan at its current price, which is usually lower after a number of years of use of the original livescan purchased.

Features of FingerPro ID include:

- Captures, Encrypts and Transmits
- Transmits Electronically to State/FBI
- Multiple Interfaces Available
- Powerful Searching and Filtering Functions
- Fast Textual and Image Data
- Images and Data stored for easy Retrieval and Re-Submissions- Generates useful Reports with
- Selective Filtering Tools

Our FingerPro ID software and Livescans are FBI certified.

Turnkey Systems

AD&S offers a complete turnkey system that electronically capture and transmit fingerprints for State/FBI. We can customize systems to fit your needs.

Call or email for a quote and information on all of our products, services, and solutions.

E-Seek ID Reader

Instantly upload demographic data with the swipe of any government-issued ID

FingerPro ID

Automation

Our card reader saves time and reduces input error. It takes demographic information from a Government Issued ID and populates the demographic data into the application automatically.

Remote workstations may be set up to transmit data to the main workstation for submissions.

Status of all records submitted are monitored and updated automatically.

You may also print your fingerprints to cards with our FBI certified printer.
